FabricAir® designs and produces custom air dispersion & air distribution solutions for a wide range of applications. In 1973 we installed the world's first fabric ducting system, which heralded a whole new way of thinking within HVAC and indoor climate. We continue to be at the forefront of innovation and proudly deliver superior air dispersion across the globe through sales companies and a substantial distributor network. Our experienced engineers ensure ideal air flow regardless of project complexity. We are headquartered in Denmark and all systems are produced to measure at our facility in Lithuania.
