

Introduction Slideshow

LEED points

FabricAir ducts and air dispersion systems are truly a value proposition. A better performing air dispersion system, at a lower cost, and many benefits that can be used to help achieve more LEED points. Depending on your project, FabricAir ducts may help you attain points in the areas of indoor air quality, acoustic environment and thermal comfort.

Everything is included in a FabricAir dispersion system

30-70% less expensive than metal

The hygienic alternative to metal

A versatile system design

The entire duct is an air diffuser

Easy installation

The most reliable lead times in the industry

Sustainable ventilation with a low carbon footprint

Long lasting

Efficient solution regardless of ceiling height

Lightweight design for heavy duty ducts

A flow model to fit your specific needs
