

FabricAir A/S

FabricAir A/S

FabricAir A/S was established in 1973 as IPS Ventilation, a division under Electrolux. In 1997 we became an independent company and in 2005 we were acquired by Brian Refsgaard, our current CEO. We handle sales, distribution, engineering and R&D tasks relating to fabric air dispersion systems. The office in Herfølge, Denmark functions as our regional sales office for Europe and is also our company headquarter. We were established in connection with the launch of the world's first fabric ducting system and have grown to employ 130 people worldwide at sales offices in eight countries and a fully owned production facility in Alytus, Lithuania.

As a company we strive to deliver the highest quality cutting edge technology within fabric air dispersion systems through attracting the best qualified people and making sure we are easy for you to do business with.
